Education

Crummer School of Business, Rollins College | Winter Park, FL
Accelerated Business Management 3/2 program
MBA Expected May 2028

Rollins College | Winter Park, FL
Bachelor of Science in Computer Science
Expected May 2027

The Crefeld School | Philadelphia, PA
High School Diploma
June 2023

Experience

Summer Intern, ProFound Therapeutics, A Flagship Pioneering Company, Boston, MA
June 15 - August 15, 2026

- Member of the AI & Platform Development team
- Worked closely with a group of scientists to create a series of tools for computational Biology & Bio-Informatic analysis
 - Protter → a tool for visualising protein structures
 - Clustal Omega → A tool for Multiple Sequence Alignment
- Worked on the internal ProFound AI tool SAGE
 - Developed a new strategy to generate possible responses to questions from SAGE, for biologists to choose direction of analysis.
 - Developed a tree-searching strategy to gather metrics from Claude to collect information from the AI, such as latency, token cost, message length, and model choice
- Presented my work to both Flagship & ProFound leadership, as well as to external partners.

Rollins STEM Student Council, Rollins College, Winter Park, FL
September 2026-present

- Work with other STEM students to create real solutions to make STEM more accessible for students
- Create, Host, and Market Stem-based events
- I manage the Instagram

Trip Leader and Field Staff, Overland Summers, Williamstown, MA
June 2024-August 2024 & June 2025-August 2025

[Github](#) [gitlab](#) [portfolio](#) [Linkedin](#)

- Co-led two-week-long hiking and camping trip in New England & Denver for 4th-6th-grade campers; ensured safety, inspired confidence and enthusiasm, instilled spirit of teamwork and problem-solving

Computer Science Club, Rollins College, Winter Park, FL

September 2023-present

- On the board of the Rollins ACM chapter
- Website building and design
- Worked on Workshop & code based challenges for students
- Work on student acquisition and member involvement

Head Youth Coach, Philadelphia Rock Gym, Wyncote, PA

May 2021-Aug 2023

- Instructed student climbers of all levels/ages in proper technique and safety
- Developed skills, motivated climbers to achieve goals, evaluated student progress, and communicated with parents
- Managed site coaches, ensured smooth operation of classes, maintained records, upheld coaching standards, and facilitated special events

Professional Presentations

Association of Teachers of Technical Writing, April 2026

- Presented research from Junior year Independent Study on using AI as a mediator in Student-Faculty email communications.
 - Built a new structure for AI prompting, allowing general AI models to better understand an input prompt from students for email generation.
 - Resulted in AI writing better emails from a single prompt.
- Ongoing work: a formal request has been submitted to the college to allow students to use the AI model for further observation of how the AI models write emails.

Technical Skills

Programming Languages: Python, Java, Swift, C, C++, JavaScript, TypeScript, R, Go

Web Development: React & React Native, [Vue.js](#), Next.js, HTML, PUG, CSS, STYLUS,

Databases: SQLite, MySQL, PostgreSQL, Athena

Other: Docker & Compose, Kubernetes, CI/CD pipelines, Terraform, Gravana, Loki, Prometheus, Helm, AWS

Relevant Coursework

- Object-Oriented Design and Development
- Computational Photography
- DevOps
- Advanced Data Analytics
- Independent Study
 - Researched how to compose more efficient emails
 - Used AI to compose the “best” and most effective emails for students

Projects

- ❖ Chat App
 - Created a 1:1 chat app for real world communication via websockets
 - Built for people in low to/no cell-service or limited wifi access
 - Uses [Socket.IO](#), Node, react & react expo
 - Uses web sockets and allows for both 1:1 and 1:n chat rooms
- ❖ Java Store
 - Built with Node.js and MySQL for the server & Maven Java for the application
 - Built in typescript, and maven java
 - Allowed users to distribute Java JAR files for application-based services
 - Allowed for simple version control of the different jar files
- ❖ UML Creator
 - Built in React, and serverless Node with PostgreSQL db
 - Used vercel deployment and a cicd pipeline for seamless deployment
 - Uses a mix of testing and prod environments
- ❖ Handwrite
 - Built in React, react native, and Node.js, as well as MySQL
 - This service will allow people with dyslexia and other learning-based disabilities to use OCR (image to raw text) and TTS (text to speech) to read with human-like voices
- ❖ Database Pro
 - Written solely in Swift
 - This Mac or app will allow developers to connect to databases and edit/manage databases.
- ❖ Berry
 - A auto dev-ops tool designed to reduce the total number of devops engineers and reduceses miss configuration
 - Written in golang
 - This project will allow for the management of all devops tooling in one synced location, and reduces need for services like digital ocean with auto config
